In Geneva, on 11 April 2022

Subject: Spontaneous application for September 2022.

To whom it may concern,

My name is Loris Vial, and I have dual French and Swiss nationality. I am currently in my 3rd and final year at the EHL Hospitality Business School and will graduate with a Bachelor of Science HES-SO in June 2022. To improve my knowledge and skills, I am currently looking for an internship or an entry position in a field of activity that I am passionate about, hence my spontaneous application.

I have always been passionate about the hospitality and the finance industry. During my studies, I had the opportunity to do internships in these two fields and while working at Quaero Capital, I developed a very deep and strong passion for the finance markets and more especially for the commodity market. Therefore, I would like to focus and direct my future experiences in the support areas (back/middle office and operations) and commodity trading with the aim to start a career in this industry. Moreover, I am especially interested in the new energies and issues related to the ecological transition. Nevertheless, the energetic transition is just one out of many challenges that the commodity industry is and will face; this moving and thrilling environment is part of the reasons that raised my interest and why I do believe I would greatly perform in this industry.

I am, by nature, a motivated person and open to new learning and culture. I have had the opportunity to work in a team on many projects, but I am also very comfortable working individually due to my great organization. I am also interested in new technologies and innovations whose approaches and methods can be applied in many fields. Therefore, I can meet your expectations because I have the motivation and the necessary skills to work in your company. Additionally, moved by a strong passion I will always go the extra step, eager to bring my very best to the company.

The company's commitment to the environment, but also to people, are values that I also share and that motivate my application. It has always been essential for me to work for a committed and responsible company. Moreover, the many areas in which the company operates show a certain openness on the part of the Louis Dreyfus Company in a very dynamic world. We learn to deal with these things during our four years of study at EHL Hospitality Business School.

In the hope of a positive response from you, I remain at your disposal for any further information you may require. Please accept my most sincere greetings.
